Prestigo concept

PRESTIGO – MAXIMISING CONVENIENCE AND QUALITY IN HOT DRINKS SERVICE

Durability and Disposability Combined

For offices, meeting rooms, airline catering and all types of foodservice locations, Prestigo is the hot drinks system designed for today's modern lifestyle.

Prestigo provides the hygiene and convenience of disposable cups without compromising on quality - and at a competitive price.

Stylish reusable cup holders support your corporate image while ultra light inlays are easily removed after use and recycled via your normal cup return system – with no need for washing up and no problems with drinks stains.

Wall and Table Organisers allow instant access to all elements of the Prestigo system and maintain a tidy environment.

Convenience, Quality and Style

The Prestigo cup holder is injection moulded in special grade polypropylene that makes it extremely durable and shatterproof even after extended use. It can be personalised using colour, embossing, printing or a combination of these features to create a unique brand or company identity.

Thermoformed in polystyrene, the Prestigo cups' insulating properties keep contents hotter for longer than a porcelain cup. Three cup sizes meet the needs of different types of drinks.

- 100ml for Espresso
- 150ml for Coffee and Cappuccino
- 200ml for Tea, Chocolate and Soups.

The Table and Wall Organisers contain cups, holders, creams, sugars and stirrers in a tidy and convenient format. There is also a small waste bin for used items
